## ABSTRACT

Educating students in the arts provides benefits not available through any other means. This guide to essential learning requirements for the arts for Washington state students defines the arts as creative expressions using sound, image, action, and movement. The guide explains that the arts help students to develop intellectual, social, personal, and aesthetic skills. It cites four essential learning requirements in the arts: (1) the student acquires the knowledge and skills necessary to create, to perform, and to respond effectively in the arts; (2) the student applies the creative process with arts knowledge and skills to reason and solve problems; (3) the student uses at least one of the art forms (visual arts, music, drama, and/or dance) to communicate ideas and feelings; and (4) the student understands how the arts connect to other subject areas, life, and work. Each learning requirement is further subdivided and detailed. (BT)

## INTRODUCTION TO ARTS

**The Arts Defined** - The arts are creative expressions using sound, image, action and movement. They are a means to satisfy the human need to communicate thoughts, feelings, and beliefs.

**Purpose** - The arts engage those capacities most characteristically human -- imagination, creativity, the ability to conceptualize and solve complex problems -- by stimulating thinking skills which are essential to learning. The arts are catalysts for change. They are vital in this rapidly changing multi-media age. They facilitate and encourage the exchange of diverse views, reflecting and shaping cultures. As technology changes, so do the tools and materials of the arts. Students are prepared through visual arts, music, drama, and dance to interact effectively in a dynamic world, with joy, confidence, and a sense of fulfillment.

**The Arts and Education** - Whether our civilization can remain dynamic, nurturing, and successful will ultimately depend on how well and how fully we develop the capacities of our children, not only to earn a living but to live a life rich in meaning.

**Intellectual Development** - The arts represent one of the primary modes of thought used to do essential work in the world at large. Through the study and practice of the arts, students employ sound, image, action, and movement to learn to solve problems, make decisions, think creatively, and use imagination.

**Social Development** - The arts represent a legacy of common achievement, a heritage of civilization that teaches us about ourselves and others. Arts education is essential to enable students to make sense of both historical and contemporary cultures. It also provides students with knowledge of past cultures, recognition of their place in contemporary culture, and insight on roles and responsibilities regarding cultural change.

**Personal Development** - Study of the arts also produces personal benefits, including self-motivation, self-discipline, and perseverance, willingness to take risks, cooperation and collaboration, productivity, craftsmanship, and thus, self-esteem.

**Aesthetic Development** - The arts provide benefits not available through any other means. Through arts education, students learn how to express themselves through the arts, interpret works of arts with deeper understanding, and more fully appreciate the natural designed world. Study of the arts provides unique opportunities to work with students' individual differences in learning styles, personalities, and ability levels while challenging those students to develop their skills of perceiving, creating, reflecting, and critiquing. The arts engage students in a process of continuous refinement and growth with the goal of achieving the highest possible standard in their work. This process not only leads to deeper understanding of one's own work and that of others in the arts, but also develops skills which are highly sought-after in the world of work.

## ARTS

- 1. The student acquires the knowledge and skills necessary to create, to perform, and to respond effectively to the arts.**

To meet this standard, the student will:

- 1.1 understand and apply arts concepts and vocabulary to communicate ideas
- 1.2 organize arts elements into artistic compositions  
*for example, color, shape, rhythm, balance*
- 1.3 use and develop arts skills and techniques to solve problems and express ideas
- 1.4 use skills of craftsmanship to produce quality work
- 1.5 create, present, and evaluate artworks using visual arts, music, drama, and dance

- 2. The student applies the creative process with arts knowledge and skills to reason and solve problems.**

To meet this standard, the student will:

- 2.1 use the senses to gather and process information  
*for example, sight, sound, touch*
- 2.2 generate and analyze solutions to problems using creativity and imagination
- 2.3 use arts criteria to consider the effectiveness of personal work and that of others

3. **The student uses at least one of the art forms (visual arts, music, drama, and/or dance) to communicate ideas and feelings.**

To meet this standard, the student will:

- 3.1 use image, sound, action, and movement through the arts to express individual ideas for a specific purpose
- 3.2 reflect and respond critically to the use of the arts in all forms of communication
- 3.3 use combinations of art forms to communicate in multi-media formats  
*for example, video or the internet*

4. **The student understands how the arts connect to other subject areas, life, and work.**

To meet this standard, the student will:

- 4.1 use arts skills and knowledge in other subject areas
- 4.2 apply ideas and skills developed in the arts to daily life
- 4.3 demonstrate an ability to use artistic knowledge in personal and community decision making
- 4.4 recognize the influence of the arts in shaping and reflecting cultures and history
